➤ **Organisational Chart and Processes:**

The style of management is integrative, participative and consultative at every decision making stage. Duties and responsibilities of various functionaries are well laid down. The organizational chart clearly depicts the flow of authority, responsibility and accountability. Hence the decision making process is transparent.

➤ ORGANIZATION STRUCTURE:

➤ **Nature and Involvement of faculty and Students in Academic Affairs and Improvements.:**

Extent of faculty involvement in academic affairs is governed at three levels. Principal meets all Heads of Department every month to take stock of academic progress, course coverage activities. A more detailed interaction of faculty is held fortnightly under direction of Director Academics. Heads of Department are on daily contact with respective faculty, attend their class, offer guidance on teaching skill and methodology beside weekly meeting with all faculties on weekly academic performance, identifying deficiencies and suggesting means to improve upon the same.

Every student gives feedback on all relevant subjects with regard to syllabi, course content, degree of difficulty, if any, in assimilation of the subject and suggestion on improvement. Students have direct access to any faculty, heads of department, coordinator academics and Principal to make suggestion on academic subject.

➤ **Mechanism /Norms & Procedure for Democratic & Good Governance.:**

As mentioned earlier, Apex decision making body is the Board of Governance who decides and gives broad direction. Governing Body has nominated local committees i.e. College Development Committee which meet once in a quarter or earlier to check compliance of direction given by Governing Body. Day to day operation of the college is managed by Principal and other appointed staff. Various Local Management Committees are well represented by both teaching and non-teaching staff who effectively participate in the respective proceedings and help in observance of democratic and good governance practice of the college.

➤ **Student feedback on Institutional Governance/Faculty Performance.:**

A committee of three Heads of Department under guidance of Director Academics and Principal meets students of all classes in each department and takes feedback on teaching methodology and performance of faculties as perceived by them. This process takes place twice in a semester. The feedback is scrutinized and analyzed with a view to improve faculty performance.

➤ **Grievance Redressal Mechanism for Faculty, Staff and Students.:**

Transparent management and administrative policy is by itself aids the redressed process in the college. The organizational chart gives out clear flow of authority and

responsibility on both academic and administrative front. Faculty, Staff and Students are thus aware of the various processes and policies and can approach any functionary with any supposed difficulty which need to be resolved.

There are suggestions boxes placed at vantage points for all personnel to drop their ideas in confidence which are looked into with all seriousness.

➤ **Grievance Redressal Mechanism as per affiliating University.:**

The vigilance committee is formed and which consists of Chairman (Member of CDC). All HODs, Rectors and Students representative. Also grievance cell is functioning in the college. The student's grievances are looked into by the H.O.D. Concerned, Principal and if needed, they are referred to the management for appropriate decision. ## FOREWORD

The Maharashtra State Board of Technical Education has adopted the policy of designing the curriculum based on the scientific principles since 1995. As a part of curriculum implementation, the student assessment norms have been implemented. These norms are now known as Assessment Norms 96. The revision of curriculum was done through various identified institutions (Design Centres) since 2001-02. The various curriculum revisions over a period of time mainly focused on professional and generic skill development in students and meeting the desired quality of teaching, learning and management. This process needed redesign of whole education process and to plan the activities at various levels such as institution, department and teacher level on regular basis. The Heads of Institutions are required to perform various functions to manage the change along with their routine activities.

The Curriculum Implementation and Assessment Norms (CIAAN) are prepared for ensuring the effective curriculum implementation. The word curriculum implementation shall not be taken in an isolated manner but as an integral part of curriculum development process at institutional level.

The latest revision of curriculum emphasises on the philosophy of Outcome Based Education (OBE) advocated by NBA. The method of OBE curriculum revision is executed in reverse manner. That is first, the Programme Outcome, Courses outcomes and Practical outcome are defined outcomes are defined, then the learning experiences are designed to achieve these outcomes. Whereas, during curriculum implementation, the teacher will analyse the contents and then develop the learning experiences which will ensure the accomplishment of outcome.

The OBE basic philosophy comprises of 5-D approach. Define the outcome, Develop the curriculum, Deliver the instructions, Document the result and Define the future course of action for improvement.

While revising the curriculum, the latest industry requirements as well as expectation from pass-outs (graduate attributes) were also considered. During the each stage of curriculum revision, the industry experts, being the main stake holders, are invited and actively involved. The product of this curriculum development process is termed as "I" Scheme curriculum. As the outcomes are finalised and validated by industry experts, most of programme curricula are now industry tailor-made and will certainly create industry ready pass-outs thus enhances diploma holders employability.

The effective implementation of curricula requires curriculum implementation guidelines for teachers and students. The Curriculum Implementation and Assessment Norms (CIAAN) is the document produced by MSBTE which will ensure uniform and smooth implementation of new “I” Scheme curricula. The newly designed CIAAN norms are focussed on the Program Outcomes (POs) and Program Educational Outcomes (PEOs). This philosophy provides feedback at regular intervals from all stake holders. This will also be helpful to the institutions to manage the resources effectively and efficiently.

The present CIAAN norms are revised and accordingly the Academic Monitoring proforma is also revised to compatible with NBA norms. The marks related to SAR proforma of NBA of Curriculum Teaching Learning Process & Program Outcomes (POs)/ Course Outcomes (COs) will be earned by every institute affiliated to MSBTE.

In the academic monitoring evaluation sheet out of 250 marks, around 70 % of marks are allotted to exclusively Academic Criterion. Even the important issues like Vision/Mission, Programme Outcome, Course outcome, Practical outcome, assessment of Micro-project etc. features of curriculum have been adequately taken care by preparing respective proforma. The documentation of progressive assessment and end semester examination will be carried out in respective proforma given in the CIAAN norms.

The efforts taken by the project team towards preparing the revised CIAAN document are appreciated. I am sure that this will bring uniformity in the curriculum implementation and student assessment to meet the expected outcomes.

## PHILOSOPHY

## 1.0 Introduction

The base for the 'I' scheme curriculum is 'Outcome-Based Education'. This means that all the outcomes at every stage of this curriculum (whether it is at macro level or at micro level) are expressed in 'tangible' terms. This again means that everybody concerned with this curriculum will look at what the student 'can do' at the end of every small and large teaching-learning (T-L) activity, but not by what the student 'knows', because 'knowing' is a *covert* activity happening within the brain of the individuals, whereas outcome is an *overt* behavior exhibited because of the possession of some skills.

It goes without saying that the basic purpose of curriculum revision is to remove obsolescence and improve the relevance. If the course contents of most of the Programs in the revised curricula are compared with existing curricula, it will be noticed that there is drastic change in the contents and the methodology of their delivery. For example, in Electrical Engineering till now only three technologies of power generation namely thermal, hydro and nuclear are taught in detail. Whereas in this revised Electrical Engineering curriculum, renewable energy technologies such as wind and solar energy are added by considering their relevance in present. Similarly, due to the advancements in digital technology, the emphasis is shifted from analog technology to digital technology in the curriculum of Electronics and Communication Engineering Program. Further, in some Programs such as Plastics, Textile Technology etc., contents on calculus and vector algebra which appeared irrelevant are eliminated. Still further, the 'environment' related courses are designed specific to the Program rather than just a general awareness level course as was being offered earlier. These and other features have been incorporated in this revised curriculum with the justifications for such changes.

## 2.0 Philosophy of Curriculum Design

The present scenario of globalization and the relatively young population of India, as compared to other developed countries of the world, have created a situation of demographic dividend for our country. This means that a great opportunity to groom young and capable work force to meet the global needs is available but the acceptance of our work force relies on the fact that the curricula offered by Polytechnics match with the provisions of Sydney Accord for Engineering Diploma Programs. National Board of Accreditation of India (NBA) has accepted most of the features of this accord. One of the core features of this 'Accord' is that the curriculum should be so designed that its implementation leads to development of tangible outcomes in the students. In this backdrop, the salient features of the revised curriculum are explained in the following paragraphs.

Figure 1 provides a brief overview of the entire outcome-based curriculum development process.

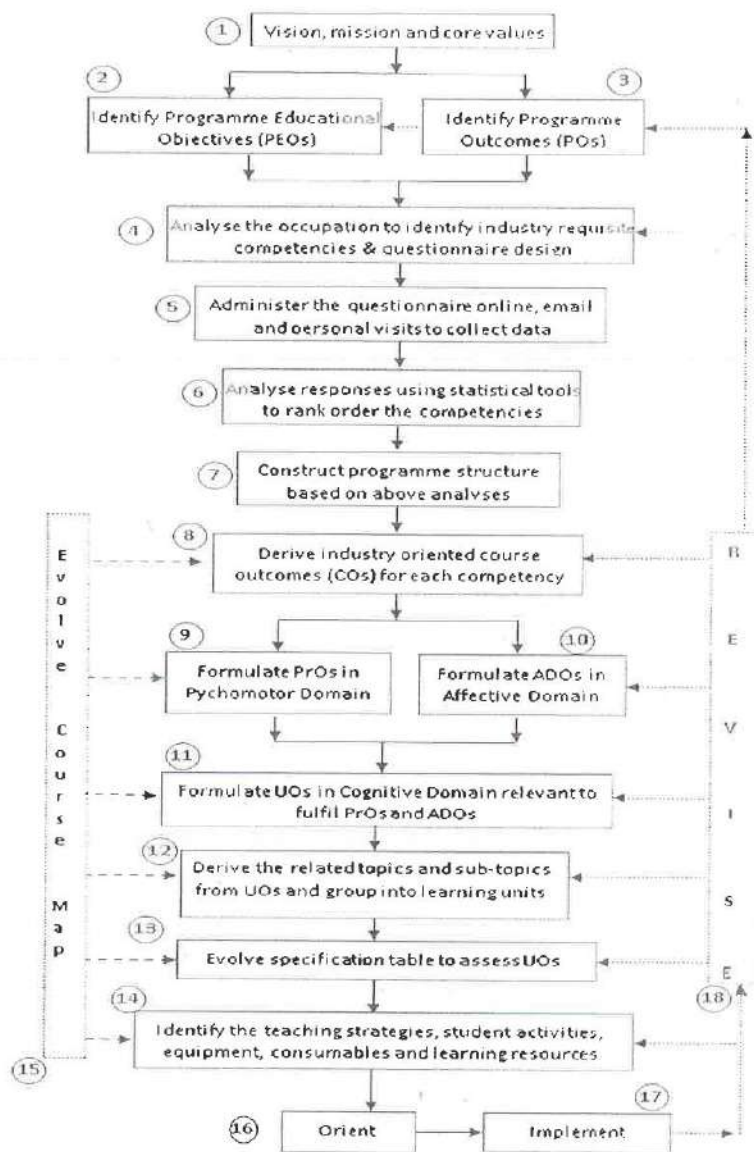

Figure 1 "Engineering Diploma Curriculum NITTR-MSBTE Model 2016"

## 2.1 Occupational Analysis

The 'P' scheme curriculum is set in motion by the MSBTE undertaking the 'occupational analysis' of each of the 18 Programs with industry inputs at various levels. Beginning with the first industrial meet in October 2015, where MSBTE invited the industries and NITTTR Bhopal for their views on curriculum revision. The deliberations involved the MSBTE views and expectations of the industry and the expertise of NITTTR in curriculum development. NITTTR Bhopal was entrusted the responsibility of consultant for the task of revising the curriculum on the outcome based education philosophy through the team of MSBTE identified Program coordinators and subject experts from polytechnics. The coordinators and the subject experts trained on-the-job for the project of curriculum revision. The trained coordinators and subject experts can further train their colleagues from different parts of the Maharashtra state. In this manner, the new curriculum is implemented in letter and spirit.

## 2.2 Employer and Alumni Survey

As the primary stakeholders of the curriculum are the employers (industries) and the pass outs of the professional engineering diploma Programs (Alumni), the expectations of the industry about competencies needed in real life work situation and the views of alumni who have gone through the hardships of adapting to the industrial scenario are considered vital. Hence, the first exercise was to design relevant questionnaires for industries and alumni to find out the competencies expected from each of the diploma Program.

For this purpose, a suggestive list of competencies was identified for each Program and the same was circulated among industries employing pass outs of that Program. Industries and alumni were asked to rate each competency (on the scale of 1 to 4) according to their view point. Based on this rating, weighted mean for each competency was calculated and the competencies were ranked in the order of their weighted mean. In addition, the industries and alumni were also asked to suggest any additional competency they feel necessary amongst the pass outs. They were also requested to inform any new technology, material, machine, equipment, instrument, procedures, software etc. which need to be included in the curriculum.

Based on analysis of data received from Industries and the alumni, the relevant courses matching the competencies were identified and the Program structure for each Program was evolved.

Competencies having low weighted mean were dropped or given less emphasis in the Program. The competencies having more weighted mean were given more emphasis in the teaching-learning process. However, competencies related to emerging areas which received less weighted mean since they were not extensively required in most of the industries, were earmarked for elective courses.

For each competency, the course outcomes (COs) are defined and for each course outcome, practical outcomes (PrOs) are evolved from these practical outcomes, unit outcomes (UOs) are derived and from these UOs, the contents for topics and subtopics are compiled.

### 2.3 Industry-Based Competencies in Addition to PEOs and POs

NBA in its latest guidelines (October 2015) has suggested 10 general POs (applicable for all Programs of Diploma in Engineering) and 2 to 4 Program Specific Outcomes (PSOs). In this curriculum there are a maximum of 14 POs for each Program and around 3 to 6 COs in each course which sums up to about 150 COs in each Program (considering that there would be about 33 courses in each Program).

Every industry or employer is more familiar with competency profiles of the Pass out students and hence the need for competency statements arose. Competency is generally a course specific single macro-level statement which indicates what the student can do in tangible terms at the end of the semester of a particular course. It is defined as cluster of skills encompassing the three domains of learning - cognitive, psychomotor and affective. Competencies are normally developed by knowledge, skills and behavior acquired during many courses. **Thus, competencies identified by industry research for the whole Program is mentioned in the beginning of each Program.**

### 2.4 Practical Outcomes (PrOs), Affective domain outcomes (ADOs) and Unit Outcomes (UOs) as subset of COs

The Washington and Sydney accords are based on Anglo-American model of education wherein each university has its own engineering college/polytechnic in its campus, which works as kind of an autonomous institute and the curriculum is developed and implemented by its own teachers for their own students. In such situation, Program Outcomes and Course Outcomes, are written in more general terms rather than specific to serve the purpose because the curriculum developer, teacher and assessor is same and he/she knows the spirit behind formulation of the POs and COs.

Wherein, in case of large state such as Maharashtra, numerous polytechnics follow the same curriculum. The curriculum developer, teacher and the assessor are different. In such a scenario, for better attainment of COs, outcomes for practicals (PrOs), outcomes in affective domain (ADOs) and outcomes for Units (UOs) are derived as subset of COs. These PrOs, ADOs and UOs are utilized for compilation of content for the particular course. The course map in figure 2 below shows the details of correlation among Competencies, COs, PrOs, ADOs, UOs and curriculum content.

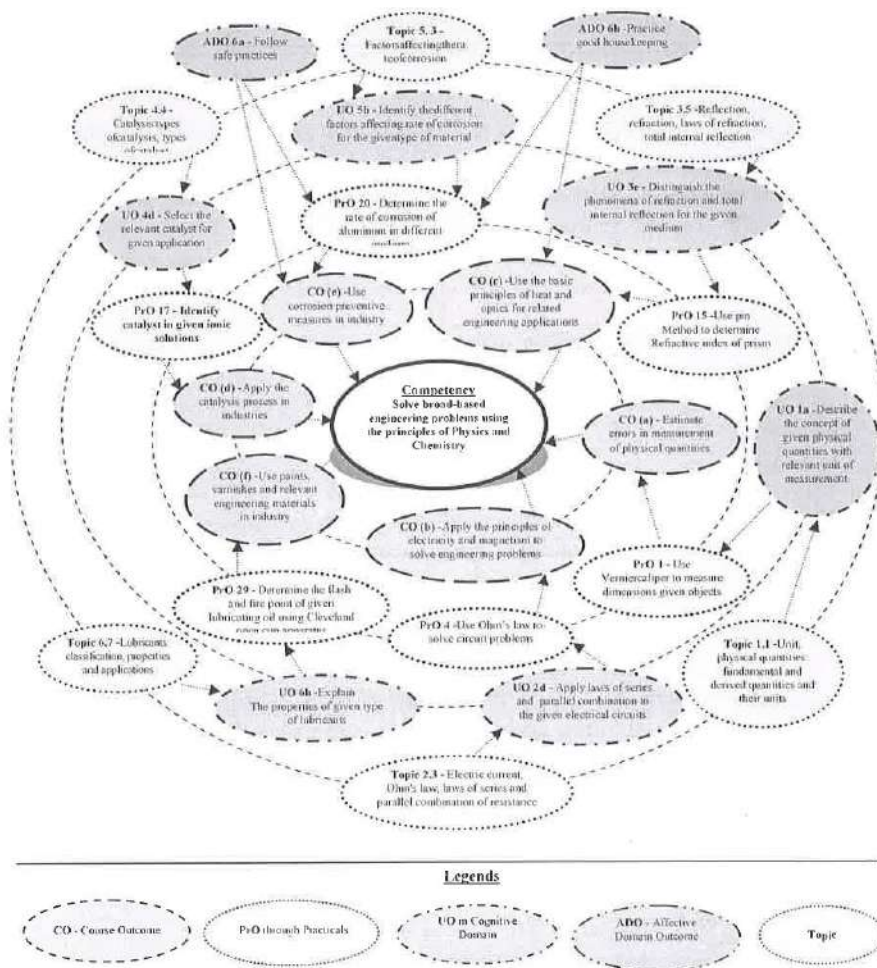

Figure 2 - Course Map

### 2.5 Micro-Projects to Assess the Attainment of Competency and COs

The analysis of COs indicates that, they are performance and Industry oriented and also an integration of theory and practical inputs of a course. These COs are broken down into

'*Practical Outcomes*' (PrOs) and the underpinning theory required to achieve those PrOs have been specified as '*Unit Outcomes*' (UOs). This makes Teaching Learning (T-L) process more effective and it enables to assess PrOs and UOs in a course wise manner.

It may be assumed that if a student has attained PrOs and UOs, then it means that s/he has also acquired COs. The concept of micro-projects is introduced to reinforce the attainment of COs. Completion of these micro-projects would ensure integration of PrOs and UOs and thus attainment of COs. Moreover, many abilities required by industry such as ability to plan, take decisions, work persistently, work in teams as leader and as a member, arrange resources, communicate effectively, find alternative solutions, identify, access and use required knowledge' and solve problems etc. can be achieved by engaging students in micro-projects.

Thus, in this curriculum model, it is mandatory for every student to complete one micro-project in each course. Students may take micro-project in groups of 10 to 12 students during first semester and progressively the group size becomes 4 to 5 students in the fourth semester. From fifth semester onwards, it is envisaged for individual micro-projects. A list of suggestive micro projects is provided in each course and students may choose micro-projects from that list or come up with relevant titles in consultation with course teachers.

*Sample rubrics are provided for assessment of micro-projects. Assessment based on these rubrics would help in qualitative evaluation of the student's abilities required by industries and this will also help students to improve upon areas of concern.* The detailed process for assessment of micro project with sample rubrics is provided in lab manuals of respective courses.

*On completion of the diploma Program, each student would have a set of around 30 micro projects compiled in the form of a Portfolio, which he/she present to the employers at the time of interview.*

#### **2.6 Assessment of Minor and Major Projects**

Minor and Major projects are introduced at the fifth and sixth semester of the diploma Program. For *Minor and Major Projects*, in addition to project report, student needs to prepare a portfolio for his/her attainment of expected graduate attributes. A sample portfolio format with suggestive questionnaire shall be provided by respective department. The above-mentioned portfolio would help student in self-assessment which ultimately lead to acquaintance of skill sets for holistic development.

The progressive assessment of project works will be carried out at three stags namely;

- Planning (during 4<sup>th</sup> to 5<sup>th</sup> week)
- Partial/mid execution (during 10<sup>th</sup> to 12<sup>th</sup> week)
- At completion stage (during 14<sup>th</sup> to 16<sup>th</sup> week)

Assessment guidelines and feedback for each stage are incorporated in the course curriculum.

The philosophy of development of curriculum and its implementation is depicted in the figure 3.

### 3.0 CURRICULUM IMPLEMENTATION & ASSESSMENT NORMS:

(In pursuant to clause 22 of Maharashtra State Board of Technical Education Act XXXVIII of 1997)

#### 3.1 Approaches for Curriculum Implementation

The MSBTE has designed this curriculum by adopting the model of Outcome Based Education (OBE) wherein it develops three key attributes among graduates namely Knowledge, Skill and Behaviour. The same approach has been considered while implementing the curriculum. (Refer Fig. 4) The salient features from the diagram are as follows.

The stake holders of the system are industry and community that requires competent technical manpower. In order to have the desired outcome, curriculum implementation process should be well planned and executed. The diagram shows sequential learning process, from state level planning to student's meaningful learning. To carry out the educational processes, the enabling processes have been identified as shown in the diagram. To ensure effective curriculum implementation, the management structure has been proposed under the control of MSBTE such as RBTE, RCC, ICIU, EAMC and IAMC. The mechanism proposed will ensure the quality of the processes. This will be achieved through the monitoring carried out by EAMC and IAMC In order to improve the relevance of graduates, the philosophy of outcome based education is implemented for ensuring the outcome rather than output. The diagram shows the outcome of this process.
